

First Street Master Plan
Los Angeles

Teaming with the firms of Campbell & Campbell and Rios Clementi Hale Studios, Suisman Urban Design will develop a conceptual master plan for First Street in Los Angeles. The 2.4 mile corridor runs through the civic heart of downtown, connecting Disney Concert Hall atop Bunker Hill on the west to Mariachi Plaza on Boyle Heights to the east. The street passes by City Hall, Little Tokyo, and the Arts District before crossing the Los Angeles River.

The plan will coordinate street operations, streetscapes and programming for the more than \$2 billion of development currently taking place along the street.
